

The International Conference on Development

“Development is the Way to achieve Welfare”

Introduction

The human and sustainable goals serve as a global plan of action aimed at achieving a happier, peaceful and equitable world.

Eradicating poverty in all its forms and dimensions, including extreme poverty, lack of access to education, healthcare and other services in the world is the greatest global challenge for governments and local & international organizations due to their negative impacts on other walks of life including production, trade, and consumption.

Ensuring sustainable development and developing sound programs for continued envelopment as a primary requirement for sustainable development drives the process of development, in all its aspects and stages, to solve the problems facing human communities. Therefore, this conference is designed to establish science-driven collaborations through partnership which functions in accordance with a transparent mechanism to identify and fill up the gaps in ineffective programs to save the human being from all risks.

In addition to this, world development programs face many problems and challenges due to their inability to achieve the average rates of success in their projects despite good planning, funds, and implementations, and learning from the best

practices. This calls on planning experts, environmentalists, industrialists, engineers, policy makers, and economists to collaborate with each others to ensure a smooth planning and smart development to meet the needs of our modern age without causing any harm to the capabilities of our next generation.

Objectives

1. To building and develop the scientific developmental capabilities of experts and specialists.
2. To design useful educational programs and scholarly projects to fill up the gaps in the field of development.
3. To enhance exchange of experiences and skills development through training programs and workshops.
4. To provide universities and research centers with studies that helps in developing their vision in developmental programs.
5. To coordinate strategic partnerships between government and private institutions in projects that serve sustainable development programs.
6. To expand the prospect of contributions by institutions and individuals in international programs on development.

7. To publish excellent academic studies and introduce their authors in renowned academic journals.

Conference Themes

1. Sustainability science and its impact on development
2. Regional planning and its impact on development
3. Development programs and its importance in urban planning.
4. Sustainability and environment in the light of development programs.
5. Cultural heritage and its role in development
6. The foundations of development and its impact on environmental management.
7. Management policies and environmental planning.
8. To enhance the role of education programs for sustainable development.
9. Human resources management and its importance in development programs.
10. To assess the impact of urbanization on the achievement of sustainable development.
11. Rural and urban development as norms of human development programs.
12. Sustainable solutions in the emerging countries.
13. Transport progress and its impact on development.
14. Energy resources and means of savings for sustainable development.

15. Urban service facilities and their role in society development.
16. Climate change in light of development programs.
17. Urban mining in light of development programs.
18. Urban architecture in light of development programs.
19. Waste management in light of development programs.
20. Urban flooding and sanitation
21. Smart systems and its contribution to development programs.
22. Indicators of sustainable development in light of development programs.
23. The United Nations Development Program goals and its impact on the development of remote areas.
24. Solutions to social and political issues in light of development programs.
25. Community planning and its role in achieving development.
26. Planning and development for equality and social justice.
27. Quality of life and development programs.
28. Medical, educational, recreational, and Eco-friendly Tourism and its impact on promoting sustainable development.
